

ALEXANDRA

Dining room

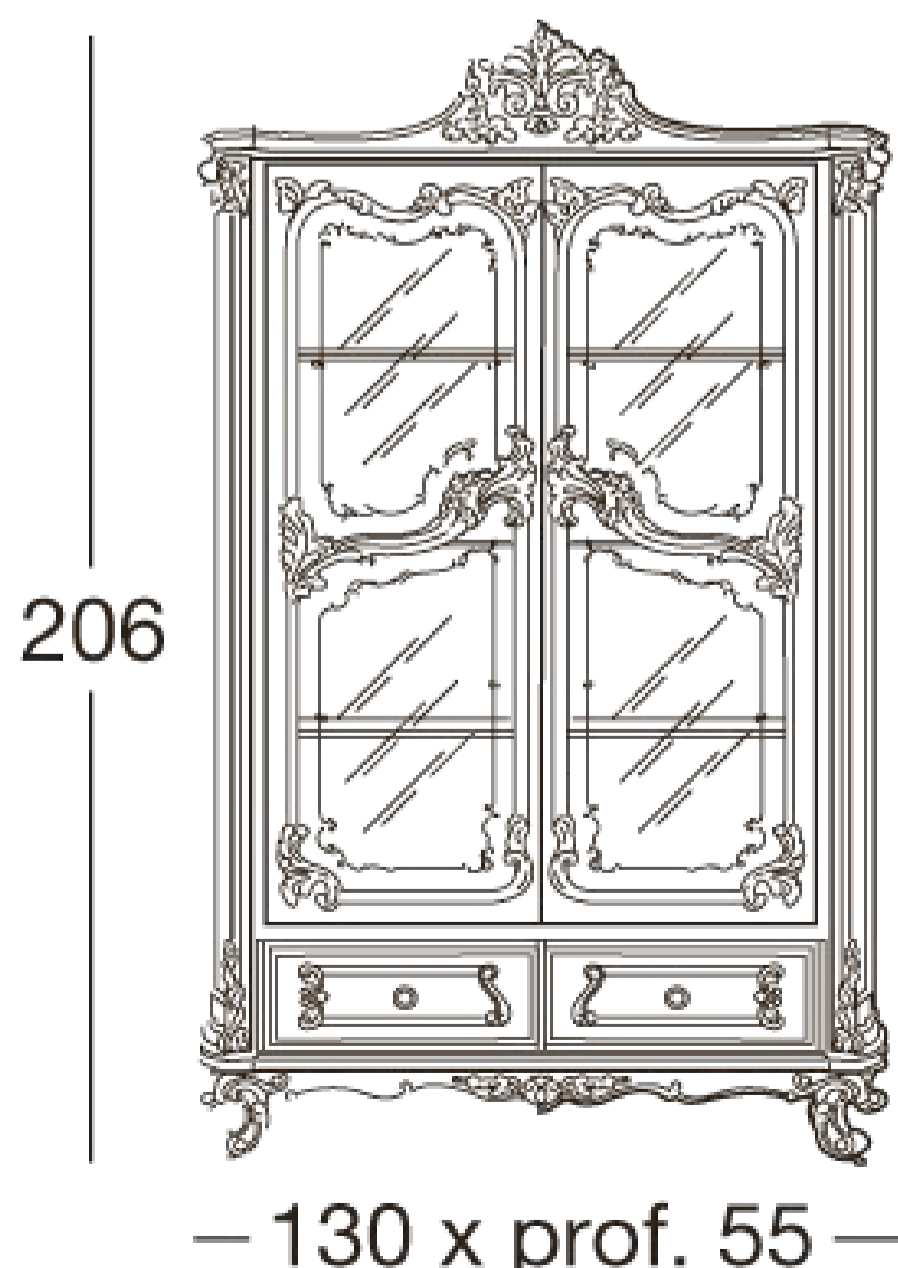

The Alexandra dining room is elegant, distinguished, and aristocratic. The chairs, finely detailed, give a royal charm and, next to the table with curved legs on which there are many pearl-shaped friezes, create a magnificent ensemble that will amaze all diners. The elegant glass cabinet is the jewel that fits perfectly into this set of craftsmanship.

Glass cabinet

In every refined dining room, accessories are essential and important, this is why in the Alexandra collection there is a two door glass cabinet with two external drawers. The interior of the glass cabinet can be lacquered or covered with fabric, perhaps matching the one used for chairs. The crystal shelves are ready to accommodate dishes, glasses, and silverware.

Table

More than two meters long, the table of the Alexandra collection is characterized by an incredible craftsmanship on the legs. A cord of pearls descends from above to the feet and, once the gold or silver leaf is applied, this detail is highlighted giving an immediate feeling of luxury. Even the long leaves, carved and with patina, give a unique effect of three-dimensionality.

Table

Chairs and armchairs of the Alexandra collection are elegant, worked to highlight the many details of the table matched to them. The backrest of the chairs, tall and regal, gives good comfort. The carvings of long sinuous leaves that climb as a frame to the fabric give an idea of luxury and elegance.
