

CALIPSO

Bedroom

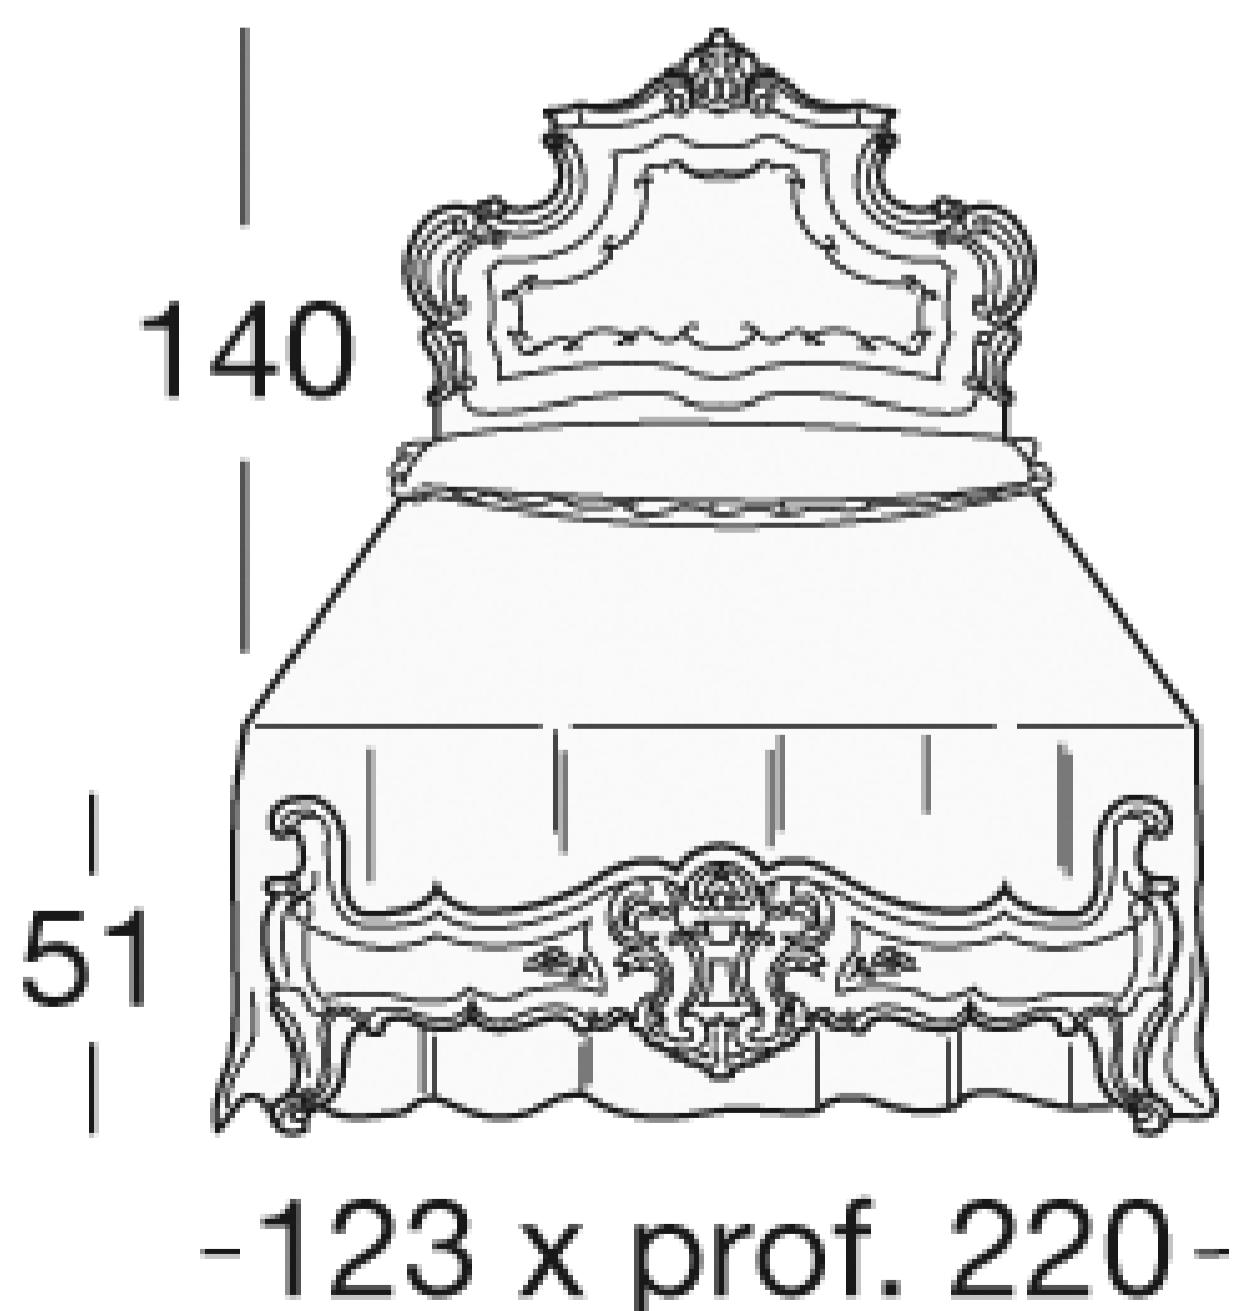

Calipso is the collection of single beds par excellence: from the tufted upholstered headboards to the one in wood wisely decorated according to the client's request, from the upholstered bed frame to the suspended nightstand. The set Calipso also has five closets from the smallest to three doors up to a real majestic wardrobe with six doors.

Single bed

The Calipso collection, elegant and characteristic, consists of three models of single bed. All three have the same carved details and the same elegant and romantic friezes but differ on the headboard for the choice between wooden or upholstered panel, as well as for the upholstered or wooden bed frame.

Night table

Calipso collection presents two different types of night tables, both stylish and charming. One is more classic with a drawer, finely worked and rich in elegant details while the other is a teardrop shaped night table to be hung directly on the wall with a wide wooden or marble top according to the client's request.

Chest of seven drawers

The Calipso collection is completed with a chest of seven drawers high 122 cm. Its capacity allows to organize objects and clothes, and the large top can be a perfect base for each accessory. The front of the chest of seven drawers can be decorated by hand at the request of the customer.

Wardrobe

The wardrobes, in perfect classic style, are shared by three bedroom collections, hence their complete adaptability to every site. Each request of the client can be satisfied: wardrobes belonging to the Iride, Elena and Calipso collections can be produced from three to six doors, with or without drawers and can be chosen with mirrors on central doors. The handmade decorations give more luxury and prestige these elegant items.
